TALC - EXTRA WHITE 10

Comments

An Ultrawhite, very fine, soft, nonabrasive, inert, low hardness, high purity and lamellar talc powder produced via modern micronising systems.

Chemical Composition

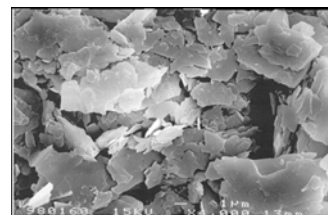

Micronised natural hydrated magnesium silicate
 $Mg_3Si_4O_{10}(OH)_2$
MgO > 30 %

Properties

Whiteness	> 96	%	
Hardness	1		Mohs
Particle	Lamellar		
pH	8 - 9		
Specific gravity	2.7	g/cc.	
Moisture content	< 1	%	

Particle Size

Below 15 microns	> 90	%
Mean particle	6	microns.

Ref. 9940

Rev. 1

Fecha: 20.09.04
